

PROJECT DESIGN PHASE-II

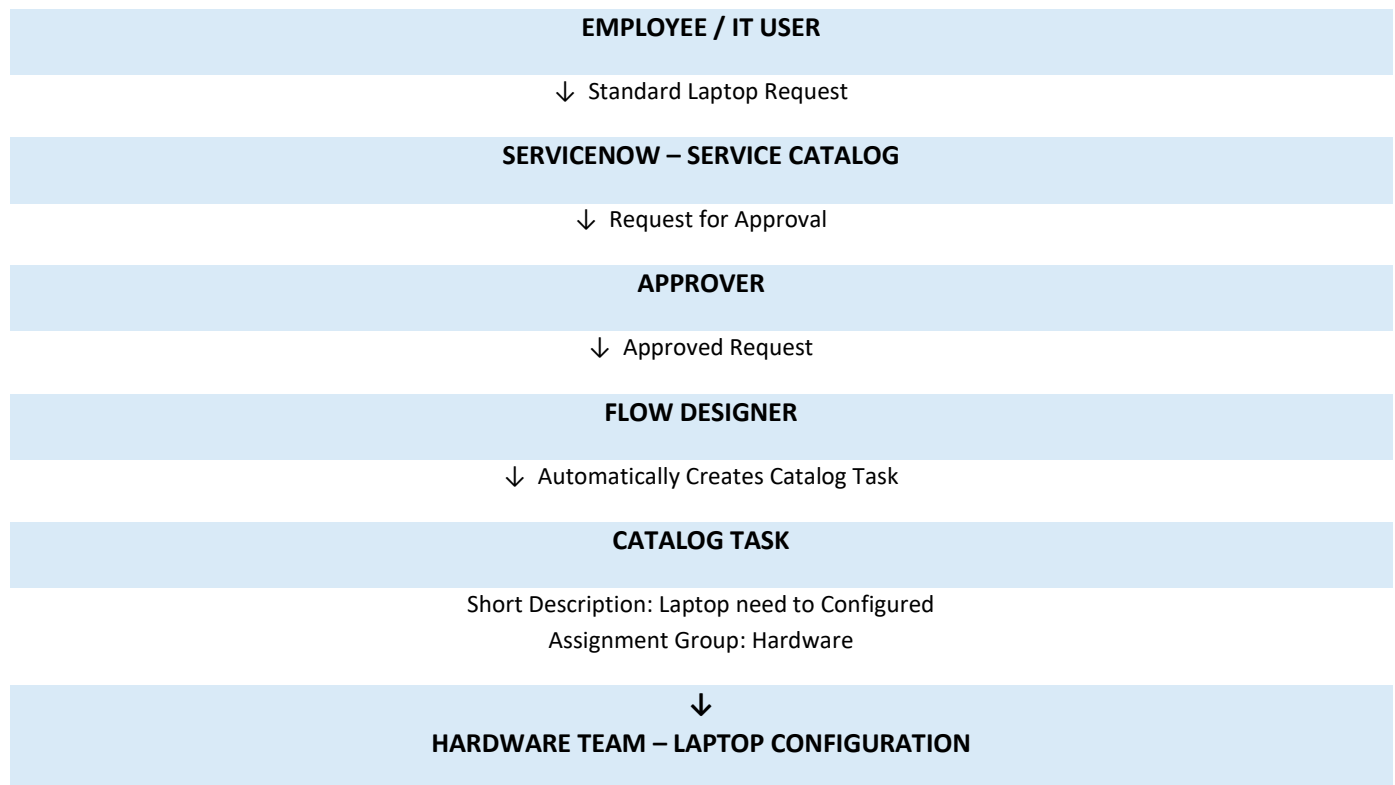

Data Flow Diagram & User Stories

Project Name: Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer

Team ID	SWTID-2026-5454
Project Name	Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Data Flow Diagram (DFD)

DFD Level 0 – Standard Laptop Procurement Automation

DFD Description: The employee/IT user submits a Standard Laptop request through the ServiceNow Service Catalog. The request is sent for approval. After approval, Flow Designer automatically creates a Catalog Task, sets the short description to “Laptop need to Configured,” and assigns the task to the Hardware group. The Hardware Team can then perform the laptop configuration.

2. User Stories

User stories are listed using the structure provided in the template: User Type, Functional Requirement (Epic), User Story Number, User Story / Task, Acceptance Criteria, Priority, and Release.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee / IT User	Standard Laptop Request	USN-1	As an employee, I can request a Standard Laptop through the Service Catalog so that my laptop requirement can be submitted.	I can select Standard Laptop and place the request successfully.	High	Sprint-1
Employee / IT User	Standard Laptop Request	USN-2	As an employee, I can view the status of my laptop request after submitting it.	I can access the request and view its current status.	Medium	Sprint-1
Approver	Request Approval	USN-3	As an approver, I can review and approve a Standard Laptop request.	The request status changes to Approved after approval.	High	Sprint-1
IT Procurement Team	Automated Task Creation	USN-4	As an IT procurement team member, I want a Catalog Task to be automatically created after approval so that manual task creation is reduced.	A Catalog Task is automatically generated after the request is approved.	High	Sprint-1
Hardware Team	Task Assignment	USN-5	As a Hardware Team member, I want the laptop configuration task to be automatically assigned to the Hardware group.	The Catalog Task shows Assignment Group = Hardware.	High	Sprint-1
Hardware Team	Laptop Configuration	USN-6	As a Hardware Team member, I can view the laptop configuration task so that I can configure the laptop before delivery.	The task contains the required short description and is available to the Hardware group.	High	Sprint-1
IT Procurement Team	Task Description	USN-7	As an IT procurement team member, I want the automatically created task to contain the required description so that the Hardware Team understands the task.	Short description and Description are updated as "Laptop need to Configured".	Medium	Sprint-1
IT Procurement Team	Process Automation	USN-8	As an IT procurement team member, I want the Standard Laptop Service Catalog item to use the created Flow so that the process is automated.	The Standard Laptop catalog item is connected to the "Standard Laptop Task" Flow.	High	Sprint-1

3. Project Workflow Reference

Standard Laptop Request → Approval → Flow Designer Trigger → Catalog Task Creation → Assignment to Hardware → Laptop Configuration

Note: The DFD and user stories are prepared from the supplied project documentation and the supplied Data Flow Diagram & User Stories template. The release/sprint labels are structured as Sprint-1 because the template requires a Release field; no separate sprint schedule was specified in the project documentation.
